

# Smart House

**Kerimbek Alisher EN3\_B04**

**Project Description:** My customer starts to work with “Smart Technologies” or we also can say IOE(Internet of Everything). Smart house system is not well-developed in our country, because people think that this is very expensive and very lazy. We want to show people, that our life can be more easier and simple, because people go home to relax, and our goal is to make them happy.

Our goals:

- Safe time
- Easy life
- To housewivemoney(accommodators ex.)
- Control house from Mobile phone or by WEB

**Actors:**

Everyone, who understands the technology(Mobile app, Web browsing)

- Member of family

**Use cases:**

Member:

Login(online)

Switches: on/off

View whole house

Mobile Application

About Screenshots:

My customer did not have any time to discuss about design, but at our first meet, he wanted to have Night Mode(Turn off all lights, Turn ON Security mode, and ask to alarm) And we are developing other functions, by searching all needed mechanisms
